

# Fétone

PRACTICAL . COMPREHENSIVE

*Another  
Brilliant Product by*

**WNW One Sdn Bhd**

THE IDEAL CHOICE

BS EN 1213 : 2000  
BS EN 200 : 2008

*The water tap usually gets the least attention when it comes to home design. Many homes today still use the traditional, original tap design which has a head that looks like a hammer. This type of tap design is actually now commonly used in the garden and other parts of the house that needs running water. Whether you want your kitchen or bathroom fixture to be a focal point or you're just looking for something functional, Fetone has exactly what you need.*

(TF-6-WSU3)

Fetone Wall Sink Tap  
(TF-6-WSL3-Q)

## Basin Tap

Basin Tap  
TF-6-B3

*The hidden challenge for most buyers is that sometimes they make uninformed choices. Unlike more than 90% of the market that uses low grade stainless steel that will cause verdigris, which is hazardous to health, Fetone is proud to claim that their spout are made of quality material such as high cooper brass in all of their kitchen sink taps. Sad but true the market can sometimes be very misleading and confusing. Also comes with a 10 years warranty, therefore buy wise and smart, choose Fetone.*

## Flush Valves

Fetone Concealed Flush Valve  
(TF-CFV-1)

Fetone Flush Valve  
(TF-FV-4)

Fetone Urinal Flush Valve  
(TF-FV-1)
